

Listed delete my address from spam is not workable
because: 1) every 5 years would change 20%. 2) All web
address going to this file would overload that backbone.

Better way: set up channels to direct email to folders eg.
make everyone place this in their header or subject.

!PURCH - would be for all internet business
transactions.

!ADV - for all internet advertising by for profit business.

!Donate - for all internet solicitation by non profits.

This way you set up channels like the tv channels and the
proper information would get put in the right folders by the email programs.
Our rights for free speech would be maintained and we choose what we want like
the tv.
a committee could determine the best keywords and more could be added later.
